

For our location in **Gratkorn/Austria..** we are looking for a

Summer Internship at NXP Austria – Gratkorn/Graz

NXP Semiconductors enables secure connections and infrastructure for a smarter world, advancing solutions that make lives easier, better and safer. As the world leader in secure connectivity solutions for embedded applications, we are driving innovation in the secure connected vehicle, end-to-end security & privacy and smart connected solutions markets.

Would you like to gain your first professional experience in an international High-Tech company? Then you are in the right place.

The tasks are diverse in the area of hardware and software development of IC's/microelectronics.

Apply with your complete application documents until 28th February 2018 in order to be part of one of our innovative and international Teams.

The minimum age for interns is 16 years.

Start date: flexible

Period: min. 6 weeks

Your Profile:

•Student of a higher technical school or technical university in SW Development, Telematics, Informatics, Electrical Engineer, Electronic Engineer, Computer Engineer or equivalent

Please send us the following documents:

- Motivation letter
- CV
- Certificates

We are looking forward to having you on board!

NXP offers competitive compensation. Due to Austrian law we are obliged to state the minimum gross salary according to legal regulations and this amounts to a monthly payment full-time of not less than EUR € 1.400,- gross.

Do you want to be a part of a semiconductor engine for the connected world and co-create the future? **Please apply via our career page:** https://nxp.wd3.myworkdayjobs.com/en-US/careers/job/Gratkorn/Summer-Internship-at-NXP-Austria---Gratkorn-Graz_R-10007812
